

Daily evidence digest

11 November 2020

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

Real-time localised risk information, human challenge studies, Pfizer vaccine

Peer reviewed journals featured:

- A real-time, interactive dashboard for US-county-level assessment of the risk that at least one person with SARS-CoV-2 is present at gatherings of different sizes [here](#)
- A 'head to head' debate focused on human challenge studies infecting healthy volunteers with COVID-19 [here](#)
- Commentary on pooled testing for COVID-19 in the UK [here](#)

Guidance and reports

- The World Health Organization COVID-19 released its weekly epidemiological update [here](#)
- The UK National Institute for Health and Care Excellence (NICE) updated its COVID-19 rapid guideline on the delivery of systemic anticancer treatments [here](#)

News and blogs

- The implications of the Pfizer COVID-19 vaccine results [here](#)
- BMJ blogs on:
 - COVID-19 modelling for time-sensitive policy decisions [here](#)
 - The ethics of nationwide COVID-19 screening in the UK [here](#)
- Managing private psychiatry practice during COVID-19 [here](#)
