Vaccine hesitancy, aerosol transmission and medical procedures, vaccine passports and health disparities

Peer reviewed journals featured:

- Systematic reviews on:
  - Factors that promote vaccine hesitancy or acceptance [here](#)
  - Aerosol production and transmission of respiratory infection associated with medical procedures involving airway suctioning or induce coughing [here](#)
- A randomised trial of azithromycin versus standard care in mild-to-moderate COVID-19 [here](#)
- Observational studies on:
  - Breakthrough infections requiring hospitalisation following Pfizer vaccination [here](#)
  - The impact of COVID-19 on colorectal cancer diagnosis and management in Australia and New Zealand [here](#)
  - Changes in short-term, long-term, and preventive care delivery during COVID-19 in the US [here](#)
  - Genomics-informed responses in the elimination of COVID-19 in Victoria [here](#)
- Commentary on:
  - Balancing quality and speed in the market approval of diagnostic tests [here](#)
  - Ongoing asthma management in children during COVID-19 [here](#)

Letters and correspondence discussed:

- Successful management of vaccine-induced immune thrombotic thrombocytopenia-related cerebral sinus venous thrombosis after AstraZeneca vaccination [here](#)
- COVID-19 patients vaccinated in the emergency department [here](#)
- Universal masking in the COVID-19 era [here](#)

Pre-peer review articles featured:

- Reduced neutralisation of Delta variant by CoronaVac and RBD-subunit vaccine [here](#)
- Estimating the failure risk of quarantine systems for preventing COVID-19 outbreaks in Australia and New Zealand [here](#)
